SUMMARY

A self-motivated software engineer who is passionate about user experience and always strives to develop for the least sophisticated user. Embrace all challenges that will require me to explore out of my comfort zone and push to bring out the best in me

EXPERINCE

• Collaborated with other team mates to build a system for keeping patient's medical

records.

• Introduced documentation to keep track of application state and make it easy for a new

teammate during onboarding.

• Nurses in OPD taking records and sending them to the doctor via the EMR system

• The doctor can send the deatials of a patient to the phamasites for medication

• Developed a chat app that helps depressed people get peer to peer therapy while chatting

with people going through similar problems.

• Fixed bugs in applications that were inhibiting future development and the addition of extra features.

• Implemented a solid authentication systerm to protect the users information.

Design a stunning flyer for winter wonderland that was published in the junior graphics
